YUKTIHIRE: REVOLUTIONIZING RECRUITMENT

Enhancing Hiring Efficiency with AI-Powered Voice Interviews

🚀 Project Synopsis – YuktiHire

🎙️ ***AI-Powered Voice Recruiter for Smarter Hiring***

🧩 The Problem

Recruiters are bogged down by **endless hours** of repetitive first-round interviews. This manual process not only slows down hiring but also drives up costs and leads to inconsistent candidate evaluations.

💡 The Solution: YuktiHire

Meet **YuktiHire**, the revolutionary **AI Voice Recruiter** that conducts human-like interviews with real-time voice interaction. It automates initial screenings with smart, conversational AI, saving valuable time, effort, and resources.

🔍 Key Features

- ✨ **Voice-Based Interviews** – Engaging, two-way AI-led conversations
- 🧠 **Smart Question Flow** – Adapts questions based on candidate responses
- 📊 **Data Management** – Securely stores responses in a Supabase database
- 🌐 **Sleek Web Interface** – Built with React + Next.js for a seamless experience
- 🔁 **Fully Customizable** – Tailor question sets and interview logic for diverse roles

---

🛠️ Tech Stack

- **Frontend**: Next.js, React
- **Voice Interaction**: Vapi (Voice API)
- **Backend & Database**: Supabase
- **Deployment**: Vercel

🎯 Target Audience

- 🏢 HR Teams & Recruiters
- 🧑‍💼 Job Seekers (Mock Interviews)
- 💻 Hiring Platforms & Portals

🧠 Future Scope

- 📈 AI-based scoring of answers
- ✉️ Detailed email reports for candidates & recruiters
- 🎥 Body language analysis via video input
- 🌍 Multi-language support for global hiring

🌟 Impact

YuktiHire is set to revolutionize the hiring process, making candidate screening faster, reducing recruiter fatigue, and enriching the **overall hiring experience** — all powered by cutting-edge voice AI.

🎤 “Revolutionizing recruitment, one voice at a time.”
